 CARBON 3K & INNEGRA
 CARBON 3K & GLASS FIBER
 CORK
INTERNAL CORE: BLACK EVA SOFT LAMINATED GUM
STRUCTURE: DOUBLE CARBONO
AVAILABLE COLOR: GOLDEN CORK
SURFACE: SMOOTH
HARDNESS: SOFT

This Padel racket stands out for its extra comfort and maneuverability, due to its low swing and reduced weight.

It is very balanced as it uses the new, exclusive and unprecedented asymmetrical hole pattern which was designed to optimize a wide sweet spot, with hole diameter for each specific area of the racket.

The gum in the center of the racket has a unique and innovative technology, a semi-drilled cross. This semi-drilled in the center translates into a controlled output with a wide and controlled sweet spot, removing the trampoline effect when defending and giving greater power in the defense moment. It has a new cap technology that further reduces vibrations derived from its softer composition and its oval shape for better grip versatility. In short, a racket balanced in all aspects of: power, control, comfort, handling and durability. Recommended for beginners/advanced players whose physical structure does not allow excessive weights.

Always with CORK PADEL's exclusive anti-vibration system.

SURFACE: ROUGH
HARDNESS: MEDIUM / HARD

The Supreme IIs were designed for high competition, for more technically advanced players.

It's higher percentage of carbon, gives Supreme IIs a more rough touch which allows players to have way more defensive control of their game and allows the racket to have a bigger level of potency. Yet, Supreme IIs maintain the excellence of comfort and low vibrations that every Cork racket has. Always, with Cork Padel's exclusive anti-vibration system.

The Supreme Control II has a medium / low balance, which makes it be a more manageable racket and suitable for defensive players.

The gum in the center of the racket has a unique and innovative technology, a semi-drilled cross. This semi-drilled cross in the center translates into a controlled output with a wide and controlled sweet spot, removing the trampoline effect when defending and giving greater power in the defense moment.
